

GURSIMRAN SINGH

Senior Product Manager — AI-Powered Platforms & Enterprise Knowledge Workflows

+91-7066534321 | gursimran63@gmail.com | [linkedin.com/in/gursimransingh-product](https://www.linkedin.com/in/gursimransingh-product)

Product Manager with 7+ years of experience building AI-powered features and scaling enterprise SaaS platforms across knowledge workflows, governance systems, and HR Tech. Proven track record of shipping AI-driven products that measurably reduce manual effort — including an AI contextual knowledge feature that cut inbound support tickets by 50%+ and a multi-vendor knowledge governance integration that contributed to ~\$2M in ARR. Deep experience with governance, API integration architecture, 0-to-1 platform builds, and systems-level product thinking across global enterprise environments — with direct applicability to AI-grounded response and knowledge management platforms. Use AI tools daily in product work — synthesizing user research transcripts, drafting PRD first drafts, mapping competitive feature matrices, and prototyping workflow designs before handing off to design.

Professional Experience

BlackLine | Senior Product Manager

May 2023 – Present

- Scoped and shipped an **AI-powered contextual knowledge feature** that surfaced precise, workflow-aware answers to user queries directly within the platform — reducing inbound support tickets by 50%+; worked closely with the AI/ML team to define LLM prompt requirements, retrieval grounding constraints, and content freshness thresholds to ensure answers remained accurate and trustworthy as the underlying platform content evolved.
- Identified a critical governance gap in tax rate management — users manually maintained tax tables, creating recurring compliance risk — and drove integration of real-time tax engine APIs; **architected a multi-vendor trusted data model** enabling customers to choose and govern their preferred knowledge source; adopted by all new enterprise customers post-launch and directly contributing to ~\$2M in ARR from 2 closed enterprise deals.
- Consolidated 4+ previously independent products into a unified enterprise suite; applied **systems-level thinking** to resolve metadata conflicts, reconcile overlapping workflows, and define a coherent information architecture; used Pendo usage analytics and support ticket analysis to sequence the roadmap for maximum friction reduction.
- Defined and tracked OKRs for the Intercompany suite including north star metrics around manual reconciliation reduction, tax error rates, and implementation cycle time — ensuring measurable outcome ownership every quarter.
- Delivered a compliant invoicing solution via third-party vendor partnership and introduced self-service invoice configuration for implementation consultants, reducing configuration time from weeks to days.
- Defined API contracts and integration requirements for third-party vendors, bridging product and engineering to ensure technically sound, extensible integrations with minimal rework.
- Partnered with UX to define information architecture and drove wireframe iterations in Figma; validated designs through structured user interviews and stakeholder workshops across US, UK, ANZ, and India.
- Conducted competitive analysis across the intercompany and tax compliance landscape; findings fed directly into roadmap prioritization and product positioning.

- Presented quarterly roadmap reviews to VP-level stakeholders; built GTM assets with Sales and Pre-Sales that enabled teams to independently demo capabilities, contributing to faster enterprise deal cycles.
-

MarketXpander Services Pvt. Ltd | Senior Executive – Product Management

June 2022 – May 2023

- Responsible for providing end-to-end CRM solutions, utilizing workflow technology to automate and streamline business processes across client engagements.
 - Conducted gap analysis to evaluate as-is vs. would-be state of the business; designed end-to-end solutions and confirmed technical feasibility prior to development.
 - Obtained stakeholder approval and validation on developed solutions; understood context of different clients to suitably structure solution implementation.
 - Maintained CRM tools best practice repository and provided end-user training and change management support on CRM systems and tools.
-

Aurus | Business Analyst – Product

November 2021 – May 2022

- Performed requirement gathering through client interviews, brainstorming sessions, and elicitation workshops; documented findings in FRDs, BRDs, and Use Cases.
 - Validated business requirements against data extracts from source owners to ensure accurate data ingestion; ensured compliance with university payment policies.
 - Handled end-to-end flows of Transaction Processing and Switching Solutions; provided assistance to payments team members as directed by management.
-

Neeeyamo Enterprise Solution | Implementation Lead / Product Manager

July 2018 – November 2021

- Served as sole PM across 3 enterprise products — Ticketing Platform, Attendance & Leave Management, and Master Data Management — owning the full product lifecycle from discovery through UAT and go-live for 50+ enterprise clients (~5,000–6,000 combined users).
- Built a **self-service FAQ knowledge module** as the core knowledge layer of the 0-to-1 ticketing platform: identified that repeat queries were clogging the ops team because there was no governed, maintained knowledge base employees could consult — designed and shipped a structured knowledge module enabling employees to self-serve answers before raising tickets, reducing repeat query volume and driving average resolution time from 7 days to 2 days across ~100,000 annual tickets.
- Led the end-to-end **0-to-1 ticketing platform build**: replaced fragmented email-based HR/payroll query workflows with a fully auditable, SLA-driven system — shipped ticket creation & tracking, auto-assignment, SLA monitoring, escalation workflows, and manager dashboards; drove 100% ticket visibility and auditability, improved ops efficiency through auto-routing, and improved client satisfaction through consistent SLA adherence.

- Designed and delivered an enterprise-grade Attendance & Leave Management system from scratch — built configurable leave policies, shift management, and real-time dashboards; integrated with downstream payroll pipelines to eliminate manual reconciliation between HR and payroll teams.
 - Created detailed PRDs, BRDs, and FRDs for all 3 products; managed user stories and sprint planning in Jira; conducted structured UAT sessions with early adopter customers before each release.
 - Conducted market and competitive analysis; engaged early adopter customers through MVP feedback sessions to ground product decisions in real enterprise use cases.
-

Education

Bachelor of Engineering in Electronics and Communication D.Y. Patil College of Engineering | August 2014 – June 2018

Certifications

- Certified Scrum Product Owner (CSPO)
-

Key Projects

- AI Contextual Knowledge Feature (BlackLine)
 - Multi-Vendor Tax Knowledge Governance Integration (BlackLine)
 - Intercompany Suite Consolidation (BlackLine)
 - Ticketing & Self-Service Knowledge Platform (Neeiamo)
 - Master Data Management (Neeiamo)
-

Skills

Product & Strategy Product Strategy & Roadmapping, OKRs & KPI Definition, PRD & BRD Writing, 0-to-1 Platform Builds, Agile / Scrum, MoSCoW Prioritization, Competitive Analysis, GTM Strategy, UAT

AI & Knowledge Systems AI-Powered Feature Development, Knowledge Workflow Design, AI-Assisted Governance, LLM-Powered Product Features, Workflow Automation, AI Tools (daily use: research synthesis, PRD drafting, competitive analysis, workflow prototyping)

Technical API Integration Design, Integration Architecture, Data Governance, LLM Infrastructure Concepts (RAG, vector retrieval, embeddings)

Research & Design User Research & Discovery, Stakeholder Management, Information Architecture, Wireframing, Figma

Tools Jira, Confluence, Pendo, Figma

Awards

- Best New Joiner Champion (2022)
- Best Lead Award (2021)
- Employee of the Year (2019–2020)
